

D.I.Y.

Do It Yourself

Spider Mite Spray

The Ingredients

- 1/8 cup buttermilk
- 1 cup whole wheat flour
- 1 1/4 gallon of water

Method

1. In a bucket combine all of the ingredients and mix completely.
2. Load into a spray bottle.

To Use

Spray this homemade Spider Mite Spray anywhere spider mites are living or crawling. The mixture should rid your garden of all types of mites.

Notes

-Before you set out into the garden to eradicate it... get to know the insects in your area. There are so many bugs living in our little backyard ecosystems — otherwise known as the garden — that are beneficial and need to be protected. Knowing which bugs are there to help your cause and those that are there to destroy it, is a very important part to harvesting a successful crop.
